EXPERIENCE

Meta, London — Software Engineer

Feb 2021 - PRESENT

Created an **index** on the data from sources like Facebook and Instagram profiles, pages and hashtags to collate them into **Consumer Insights Platform** UI that gives content creators the data and insights they need to succeed.

Developed the **algorithm** to calculate the common **solution score** for **recommendations** spread across multiple platforms and load the same in the **Recommendations Manager** UI.

Developed the **Goals API** as well as the Goals UI with CRUD capabilities for **Partner Goals**. Created the **translation logic** from raw data to a downloadable PowerPoint Presentation for **Live Reports Platform**. Also, created an **interactive charting solution** to aggregate data from different partners on the go.

Microsoft, Noida — SDE 2

May 2020 - Feb 2021

As a part of the **Special Clouds team**, Onboarded **media and stateless services** onto the **Kubernetes-based deployment** platform. Developed an **Admin panel for cloud systems** access. Developed **Security and compliance protocols** for MS office 365 on cloud.

Expedia, Gurugram — SDE 1

July 2017 - May 2020

As a part of the User team, Onboarded **Google sign in**, **Alexa** Voice Sign ups, responsive **User Profile** page, **Apple** sign in. Also built a pluggable inline **global sign in sign up** module.

Expedia, Gurugram — Associate Software Developer Intern

June 2016 - July 2016

As a part of the **UGC team**, Created a **comment moderation platform** to cater the manual moderation of comments post auto moderation.
